Report of the Mid Staffordshire NHS Foundation Trust Public Inquiry Mid Staffordshire NHS Foundation Trust Public Inquiry, Robert Francis, 2013-02-06 This public inquiry report into serious failings in healthcare that took place at the Mid Staffordshire NHS Foundation Trust builds on the first independent report published in February 2010 (ISBN 9780102964394). It further examines the suffering of patients caused by failures by the Trust: there was a failure to listen to its patients and staff or ensure correction of deficiencies. There was also a failure to tackle the insidious negative culture involving poor standards and a disengagement from managerial and leadership responsibilities. These failures are in part a consequence of allowing a focus on reaching national access targets, achieving financial balance and seeking foundation trust status at the cost of delivering acceptable care standards. Further, the checks and balances that operate within the NHS system should have prevented the serious systemic failure that developed at Mid Staffs. The system failed in its primary duty to protect patients and maintain confidence in the healthcare system. This report identifies numerous warning signs that could and should have alerted the system to problems developing at the Trust. It also sets out 290 recommendations grouped around: (i) putting the patient first; (ii) developing a set of fundamental standards, easily understood and accepted by patients; (iii) providing professionally endorsed and evidence-based means of compliance of standards that are understood and adopted by staff; (iv) ensuring openness, transparency and candour throughout system; (v) policing of these standards by the healthcare regulator; (vi) making all those who provide care for patients, properly accountable; (vii) enhancing recruitment, education, training and support of all key contributors to the provision of healthcare; (viii) developing and

sharing ever improving means of measuring and understanding the performance of individual professionals, teams, units and provider organisations for the patients, the public, and other stakeholders.

Birth Control in China 1949-2000 Thomas Scharping,2013-07-04 This comprehensive volume analyses Chinese birth policies and population developments from the founding of the People's Republic to the 2000 census. The main emphasis is on China's 'Hardship Number One Under Heaven': the highly controversial one-child campaign, and the violent clash between family strategies and government policies it entails. Birth Control in China 1949-2000 documents an agonizing search for a way out of predicament and a protracted inner Party struggle, a massive effort for social engineering and

grinding problems of implementation. It reveals how birth control in China is shaped by political, economic and social interests, bureaucratic structures and financial concerns. Based on own interviews and a wealth of new statistics, surveys and documents, Thomas Scharping also analyses how the demographics of China have changed due to birth control policies, and what the future is likely to hold. This book will be of interest to students and scholars of Modern China, Asian studies and the social sciences.

Slides for Students Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that. Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

Lean UX Jeff Gothelf, Josh Seiden, 2016-09-12 UX design has traditionally been deliverables-based. Wireframes, site maps, flow diagrams, content inventories, taxonomies, mockups helped define the practice in its infancy. Over time, however, this deliverables-heavy process has put UX designers in the deliverables business. Many are now measured and compensated for the depth and breadth of their deliverables instead of the quality and success of the experiences they design. Designers have become documentation subject matter experts, known for the quality of the documents they create instead of the end-state experiences being designed and developed. So what's to be done? This practical book provides a roadmap and set of practices and principles that will help you keep your focus on the the experience back, rather than the deliverables. Get a tactical understanding of how to successfully integrate Lean and UX/Design; Find new material on business modeling and outcomes to help teams work more strategically; Delve into the new chapter on experiment design and Take advantage of updated examples and case studies.

Drawdown Paul Hawken, 2018-02-22 NEW YORK TIMES BESTSELLER For the first time ever, an international coalition of leading researchers, scientists and policymakers has come together to offer a set of realistic and bold solutions to climate change. All of the techniques described here - some well-known, some you may have never heard of - are economically viable, and communities throughout the world are already enacting them. From revolutionizing how we produce and consume food to educating girls in lower-income countries, these are all solutions which, if deployed collectively on a global scale over the next thirty years, could not just slow the earth's warming, but reach drawdown: the point when greenhouse gasses in the atmosphere peak and begin to decline. So what are we waiting for?

Better, Simpler Strategy Felix Oberholzer-Gee, 2021-04-20 Named one of the best strategy books of 2021 by strategy+business Get to better, more effective strategy. In nearly every business segment and corner of the world economy, the most successful companies dramatically outperform their rivals. What is their secret? In *Better, Simpler Strategy*, Harvard Business School professor Felix Oberholzer-Gee shows how these companies achieve more by doing less. At a time when rapid technological change and global competition conspire to upend traditional ways of doing business, these companies pursue radically simplified strategies. At a time when many managers struggle not to drown in vast seas of projects and initiatives, these businesses follow simple rules that help them select the few ideas that truly make a difference. *Better, Simpler Strategy* provides readers with a simple tool, the value stick, which every organization can use to make its strategy more effective and easier to execute. Based on proven financial mechanics, the value stick helps executives decide where to focus their attention and how to deepen the competitive advantage of their business. How does the value stick work? It provides a way of measuring the two fundamental forces that lead to value creation and increased financial success—the customer's willingness-to-pay and the employee's willingness-to-sell their services to the business. Companies that win, Oberholzer-Gee shows, create value for customers by raising their willingness-to-pay, and they provide value for talent by lowering their willingness-to-sell. The approach, proven in practice, is entirely data driven and uniquely suited to be cascaded throughout the organization. With many useful visuals and examples across industries and geographies, *Better, Simpler Strategy* explains how these two key measures enable firms to gauge and improve their strategies and operations. Based on the author's sought-after strategy course, this book is your must-have guide for making better strategic decisions.

Super Founders Ali Tamaseb,2021 Every VC is chasing a unicorn-those billion dollar companies that fundamentally change their industries, and every entrepreneur certainly wants to become one. For Super Founders, author Ali Tamaseb gathered and analyzed 40,000 data points about the 200+ unicorns founded since 2005 and found out what these billion dollar companies and their founders actually looked like. And you'll be surprised by what he discovered. Half of unicorn founders are over 35. Most founders don't have any directly relevant work experience in the industry they're disrupting. There's no disadvantage to being a solo founder. Sixty percent of billion dollar companies are started by repeat entrepreneurs, many of whom already have at least one \$50M+ exit under their belt. And over half of unicorns were competing with multiple incumbents at the time of their founding. What we thought we knew about these companies doesn't turn out to be true, which has serious implications for both the kinds of startups that get funding and the for the kinds of people who decide to start companies in the first place. Super Founders gives readers an unprecedented look not just at what the data tells us about the world's most successful startups and the people who create them, but also at those companies and founders themselves, many of which are not well-known among the general public. A blend of data, analysis, stories and exclusive interviews, the book is a paradigm-shifting guide for entrepreneurs and the investment community. You may look more like a Super Founder than you think!--
