Beyond Free College Eileen L. Strempel, Stephen J. Handel, 2021-01-15 *Beyond Free College* outlines an audacious national agenda—consistent with, but far more comprehensive than, the current “free college” movement—that builds on the best of US higher education’s populist history such as the G.I. Bill and the community college transfer function. The authors align a wide constellation of higher education trends—online learning, prior learning assessment, competency-based learning, high school college-credit— with a rapidly shifting student transfer environment that privileges college credit as the pivotal educational catalyst to boost access and completion. The book’s agenda seeks greater productive investment in postsecondary education by privileging a single metric—lower-cost-per-degree-granted—as the animating driver of a transfer pathway that will fulfill the potential of its historical, progressive innovators. *Beyond Free College*’s goal is as simple as it is urgent: To galvanize higher education advocates in an effort to reorganize, reorient, and reignite the transfer function to serve the needs of a neotraditional student population that now constitutes the majority of college-goers in America; and in ways that advance completion, not just access to higher education.

**Meaningful Work** Shawn Askinosie, Lawren Askinosie, 2017-11-14 The founder and CEO of Askinosie Chocolate, an award-winning craft chocolate factory, shows readers how he discovered the secret to purposeful work and business – and how we can too, no matter what work we do. Askinosie Chocolate is a small-batch, award winning chocolate company widely considered to be a vanguard in the industry. Known for sourcing 100% of his cocoa beans directly from farmers across the globe, Shawn Askinosie has pioneered direct trade and profit sharing in the craft chocolate industry with farmers in Tanzania, Ecuador, and the Philippines. In addition to developing relationships with smallholder farmers, the company also partners with schools in their origin communities to provide lunch to 1,600 children every day with no outside donations. Twenty-five years ago, Shawn Askinosie was a successful criminal defense lawyer trying his first murder death penalty case that would later go on to become a Dateline special. For many years he found law satisfying, but after several high profile trials he reached a breaking point and found solace in the search for a new career. In this inspiring guide to discovering a vocation that feeds your heart and soul, Askinosie describes his quest to discover more meaningful work - a search that led him to volunteering in the palliative care wing of a hospital, to a Trappist monastery where he became inspired by the monks focus on “being” rather than “doing,” and eventually traipsing through jungles across the globe in search of excellent cocoa

bean farmers to make award winning chocolate. Askinosie shares his hard-won insights into doing work that reflects one's values and purpose in life. He shares with readers visioning tools that can be used in any industry or field to create a work life that is inspired and fulfilling. Askinosie shows us that everyone has the capacity to find meaning in their work and be a positive force for good in the world.

He's a former Navy SEAL sniper, and he's been in more firefights than most people have had hot meals. Lauren Dare scares the crap out of him. Gorgeous, talented and refined, she's the type of woman who could never be interested in a roughneck like him. So he's loved her fiercely in secret, taken her art classes, and kept a watchful but comfortable distance. Until now. Lauren had finally found a home in Portland, far from her real identity, far from the memories of her mother's death, and outside the reaches of the drugged-out psycho who's already tried to kill her twice. One tiny misstep—a single photograph—has shattered it all. She has no choice but to run again, but this time she'll give herself a proper farewell: one night with Jacko. Their highly charged emotional encounter changes everything. In Jacko's arms there cannot be fear, there can only be pleasure. Anyone wishing her harm will have to pass through him, and Jacko is a hard man to kill. One-click with confidence. **This Is Water** Kenyon College,2014-05-22 Only once did David Foster Wallace give a public talk on his views on life, during a commencement address given in 2005 at Kenyon College. The speech is reprinted for the first time in book form in *THIS IS WATER*. How does one keep from going through their comfortable, prosperous adult life unconsciously? How do we get ourselves out of the foreground of our thoughts and achieve compassion? The speech captures Wallace's electric intellect as well as his grace in attention to others. After his death, it became a treasured piece of writing reprinted in *The Wall Street Journal* and the *London Times*, commented on endlessly in blogs, and emailed from friend to friend. Writing with his one-of-a-kind blend of causal humor, exacting intellect, and practical philosophy, David Foster Wallace probes the challenges of daily living and offers advice that renews us with every reading.

*Integrating Information Technology into the Teacher Education Curriculum* Nancy Wentworth,Rodney Earle,Michael Connell,2013-01-11 As teaching evolves, teacher education must keep up. This book examines systemic reforms that incorporate new technology to improve any teacher education program. While there are books that address the integration of technology into teaching curricula, very few address the process for teacher education faculty and the systemic reform of a teacher education program. *Integrating Information Technology into the Teacher Education Curriculum: Process and Products of Change* provides practical examples and suggestions for teacher education departments striving to integrate new technologies into their curriculum. It will help in the effort to motivate faculty to make utilizing new technology a natural strategy for the teachers they are educating. It describes the creation of Design Teams at Brigham Young University's McKay School of Education (funded by a PT3 grant) and how these teams worked to successfully reconfigure the school's teacher preparation curricula. *Integrating Information Technology into the Teacher Education Curriculum* examines: how to compose and create a curriculum design team—including both teacher education and content-specific methods instructors training and collaboration opportunities that focus on the infusion of technology how to facilitate alignment among a university, cooperating school districts, the State Office of Education, and other available teacher preparation programs specific case examples of the redevelopment of teacher education courses by the instructors who teach them the process of changing a technology course required by the teacher education program the process of extending grant activities to the university's partner school districts and the State Office of Education From the editors: Preparing tomorrow's teachers to use technology in schools is a complex endeavor requiring the infusion of technology into curriculum and instructional practices at all levels of the pre-service program. In many early teacher education programs, prospective teachers took a computer literacy class separate from content methods classes and rarely engaged in real collaboration on how schoolteachers could integrate technology into authentic learning experiences. By focusing merely on how to use computers, technology training failed by not addressing how to teach students more effectively using a variety of technological tools. What teachers need to know most is how to teach content more effectively. Technology integration should cause teachers to develop different perspectives through rethinking teaching and learning. Teaching with technology causes teachers to confront their established beliefs about instruction and their traditional roles as classroom teachers.

**Education Law, Policy, and Practice** Michael J. Kaufman, Sherelyn R. Kaufman, 2017-09-12 Challenging students to question the political and philosophical assumptions underlying the law, *Education Law, Policy, and Practice* promotes a depth of understanding about the key cases and statutes. The authors integrate the law with policy and practice, following related political, financial, and practical issues. The law is presented through a teachable mix of key cases and materials on the practice and political aspects of school law, and an effective macro organization helps place topics into an integrated framework. Each of the major issues in education law is discussed at length: the boundaries of public and private, church and state, relations; school governance and the tensions between federal power and local control; the rights and responsibilities of students and teachers; and the educational environment and its liabilities. "Practicums" in each section allow students to apply the law to realistic situations. Features: New cases: *Endrew F. v. Douglas County School District*; *Fisher v. the University of Texas*. A complete description and analysis of the brand new Every Student Succeeds Act of 2015. A series of key questions and answers that follow each major section, and are designed to provide formative and summative assessments of student learning outcomes.
