Disabled Childhoods Janice McLaughlin, Edmund Coleman-Fountain, Emma Clavering, 2016-02-05 A crucial contemporary dynamic around children and young people in the Global North is the multiple ways that have emerged to monitor their development, behaviour and character. In particular disabled children or children with unusual developmental patterns can find themselves surrounded by multiple practices through which they are examined. This rich book draws on a wide range of qualitative research to look at how disabled children have been cared for, treated and categorised. Narrative and longitudinal interviews with children and their families, along with stories and images they have produced and notes from observations of different spaces in their lives - medical consultation rooms, cafes and leisure centres, homes, classrooms and playgrounds amongst others - all make a contribution. Bringing this wealth of empirical data together with conceptual ideas from disability studies, sociology of the body, childhood studies, symbolic interactionism and feminist critical theory, the authors explore the multiple ways in which monitoring occurs within childhood disability and its social effects. Their discussion includes examining the dynamics of differentiation via medicine, social interaction, and embodiment and the multiple actors - including children and young people themselves - involved. The book also investigates the practices that differentiate children into different categories and what this means for notions of normality, integration, belonging and citizenship. Scrutinising the multiple forms of monitoring around disabled children and the consequences they generate for how we think about childhood and what is 'normal', this volume sits at the intersection of disability studies and childhood studies.

The Coding Manual for Qualitative Researchers Johnny Saldana, 2012-11-19 An in-depth guide to each of the multiple approaches available for coding qualitative data. In total, 32 different approaches to coding are covered, ranging in complexity from beginner to advanced level and covering the full range of types of qualitative data from interview transcripts to field notes.

[The Bullet Journal Method](#) Ryder Carroll, 2021-12 THE NEW YORK TIMES BESTSELLER Transform your life using the

Bullet Journal Method, the revolutionary organisational system and worldwide phenomenon. The Bullet Journal Method will undoubtedly transform your life, in more ways than you can imagine' Hal Elrod, author of The Miracle Morning In his long-awaited first book, Ryder Carroll, the creator of the enormously popular Bullet Journal organisational system, explains how to use his method to: * TRACK YOUR PAST: using nothing more than a pen and paper, create a clear, comprehensive, and organised record of your thoughts and goals. * ORDER YOUR PRESENT: find daily calm by prioritising and minimising your workload and tackling your to-do list in a more mindful and productive way. * PLAN YOUR FUTURE: establish and appraise your short-term and long-term goals, plan more complex projects simply and effectively, and live your life with meaning and purpose. Like many of us, Ryder Carroll tried everything to get organised - countless apps, systems, planners, you name it. Nothing really worked. Then he invented his own simple system that required only pen and paper, which he found both effective and calming. He shared his method with a few friends, and before long he had a worldwide viral movement. The system combines elements of a wishlist, a to-do list, and a diary. It helps you identify what matters and set goals accordingly. By breaking long-term goals into small actionable steps, users map out an approachable path towards continual improvement, allowing them to stay focused despite the crush of incoming demands. But this is much more than a time management book. It's also a manifesto for what Ryder calls intentional living: making sure that your beliefs and actions align. Even if you already use a Bullet Journal, this book gives you new exercises to become more calm and focused, new insights on how to prioritise well, and a new awareness of the power of analogue tools in a digital world. *** This book has been printed with three different colour designs, black, Nordic blue and emerald. We are unable to accept requests for a specific cover. The different covers will be assigned to orders at random. ***

Encompassing Gender Mary M. Lay, Janice J. Monk, Deborah Rosenfelt, 2002 From Beijing to Seattle, women's movements within academe and in local-global communities are growing at an unprecedented rate, raising pointed questions about paradigms of Western feminism, development, global trade, and scholarship. Despite this growing visibility, the perspectives of far too many women, especially from the Global South, are still excluded from mainstream U.S. scholarship. Presented with the task of preparing students for life in this new and rapidly shrinking world, many scholars have found themselves overwhelmed by the need to cross disciplinary and geographic borders. But some faculty are leading the way -- often in defiance of academic traditions and prejudices -- to a curriculum that reflects consequences of globalization. *Encompassing Gender* is the long-awaited anthology of more than 40 essays by 60 scholars, many of them working in curriculum-transformation groups that cut across the humanities, the sciences, and the social sciences, all of them committed to an interdisciplinary approach to internationalizing the curriculum.

Digital citizenship education handbook Janice Richardson, Elizabeth Milovidov, 2019-02-25 Being online, well-being online, and rights online: information, tools and good practice Digital citizenship competences define how we act and interact online.

They comprise the values, attitudes, skills and knowledge and critical understanding necessary to responsibly navigate the constantly evolving digital world, and to shape technology to meet our own needs rather than to be shaped by it. The Digital citizenship education handbook offers information, tools and good practice to support the development of these competences in keeping with the Council of Europe's vocation to empower and protect children, enabling them to live together as equals in today's culturally diverse democratic societies, both on- and offline. The Digital citizenship education handbook is intended for teachers and parents, education decision makers and platform providers alike. It describes in depth the multiple dimensions that make up each of ten digital citizenship domains, and includes a fact sheet on each domain providing ideas, good practice and further references to support educators in building the competences that will stand children in good stead when they are confronted with the challenges of tomorrow's digital world. The Digital citizenship education handbook is consistent with the Council of Europe's Reference Framework of Competences for Democratic Culture and compatible for use with the Internet literacy handbook.

The Roots of Verbal Meaning John Beavers, Andrew Koontz-Garboden, 2020 This book explores possible and impossible word meanings, with a specific focus on the meanings of verbs. It presents a new theory of possible root meanings and their interaction with event templates that produces a new typology of possible verbs, with semantic and grammatical properties determined not just by templates, but also by roots.

The Puppet Masters Emile van der Does de Willebois, J.C. Sharman, Robert Harrison, Ji Won Park, Emily Halter, 2011-11-01 This report examines the use of these entities in nearly all cases of corruption. It builds upon case law, interviews with investigators, corporate registries and financial institutions and a 'mystery shopping' exercise to provide evidence of this criminal practice.

Gear Acquisition Syndrome Jan-Peter Herbst, Jonas Menze, 2021-04-19 Gear Acquisition Syndrome, also known as GAS, is commonly understood as the musicians' unrelenting urge to buy and own instruments and equipment as an anticipated catalyst of creative energy and bringer of happiness. For many musicians, it involves the unavoidable compulsion to spend money one does not have on gear perhaps not even needed. The urge is directed by the belief that acquiring another instrument will make one a better player. This book pioneers research into the complex phenomenon named GAS from a variety of disciplines, including popular music studies and music technology, cultural and leisure studies, consumption research, sociology, psychology and psychiatry. The newly created theoretical framework and empirical studies of online communities and offline music stores allow the study to consider musical, social and personal motives, which influence the way musicians think about and deal with equipment. As is shown, GAS encompasses a variety of practices and psychological processes. In an often life-long endeavour, upgrading the rig is accompanied by musical learning processes in popular music.

Working with Academic Literacies Theresa Lillis, Kathy Harrington, 2015-11-04 The editors and contributors to this collection explore what it means to adopt an “academic literacies” approach in policy and pedagogy. Transformative practice is illustrated through case studies and critical commentaries from teacher-researchers working in a range of higher education contexts—from undergraduate to postgraduate levels, across disciplines, and spanning geopolitical regions including Australia, Brazil, Canada, Cataluña, Finland, France, Ireland, Portugal, South Africa, the United Kingdom, and the United States.

The Development, Conceptualisation and Implementation of Quality in Disability Support Services Jan Šiška, Julie Beadle-Brown, 2021-08-01 Social services for people with disabilities have undergone substantial changes over time, in particular in the past two decades. Whilst lack of affordable and appropriate housing is a barrier to community living for many people with disabilities, it is only one part of the jigsaw. This book traces some of these changes, in particular related to living situation and support available, in a range of different countries and considers the factors that have influenced these changes. This book considers other aspects of what is needed to bring about real change in the lives of all people with disabilities.

Slow Violence and the Environmentalism of the Poor Rob Nixon, 2011-06-14 “Groundbreaking in its call to reconsider our approach to the slow rhythm of time in the very concrete realms of environmental health and social justice.” —Wold Literature Today The violence wrought by climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war takes place gradually and often invisibly. Using the innovative concept of slow violence to describe these threats, Rob Nixon focuses on the inattention we have paid to the attritional lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today. Slow violence, because it is so readily ignored by a hard-charging capitalism, exacerbates the vulnerability of ecosystems and of people who are poor, disempowered, and often involuntarily displaced, while fueling social conflicts that arise from desperation as life-sustaining conditions erode. In a book of extraordinary scope, Nixon examines a cluster of writer-activists affiliated with the environmentalism of the poor in the global South. By approaching environmental justice literature from this transnational perspective, he exposes the limitations of the national and local frames that dominate environmental writing. And by skillfully illuminating the strategies these writer-activists deploy to give dramatic visibility to environmental emergencies, Nixon invites his readers to engage with some of the most pressing challenges of our time.

The Innovative Bureaucracy Alexander Styhre, 2007-03-06 Highly original and based on unique empirical research in the fields of organization theory and organization behaviour, this work makes an invaluable contribution to the literature on bureaucracy and innovation. Focusing on a study of two major companies working with innovation and new product development Styhre's critical analysis pushes the boundaries of bureaucracy studies beyond its current entrenched position. Departing from the traditional view that bureaucratic organizations are inefficient, incapable of responding to external changes, unable to orchestrate innovative work and provide meaningful jobs for its co-workers, this empirical study underlines the merits of a functional organization, the presence of specialist and expertise groups and hierarchical structures. Analyzing the literature of bureaucracy, the new forms of post-bureaucratic organizations and drawing on the philosophy of Henri Bergson, the author offers a model of bureaucracy, capable of both apprehending its functional organization and its continuous and ongoing modifications and changes to adapt to external conditions. Innovative and compelling, this book is an excellent text for advanced students of organization and management theory and managerial strategists and decision-makers across the globe.

Construction Stakeholder Management Ezekiel Chinyio, Paul Olomolaiye, 2009-10-22 This book captures best practice in construction stakeholder management using a range of international case studies. It demonstrates stakeholder mapping, presents the power/interest matrix and analyses a model for the timely engagement of stakeholders. The increased use of partnering and other relational forms of contracting have underlined the need for project participants to work together and also to be aware of all those who can affect or be affected by a project and its associated developments. Stakeholder management enables them to see this wider picture and provides guidance for managing the diverse views and interests that can manifest in the course of a project's life. All construction projects have the potential for conflicts of interest that can

result in costly and damaging legal proceedings. This new book advocates an alternative to dispute resolution that is proactive, practical and global in its application. Construction Stakeholder Management is therefore an essential text for advanced students, lecturers, researchers and practitioners in the built environment.

Domestic Violence and Sexuality Donovan, Catherine, Hester, Marianne, 2014-04-29 This book provides the first detailed discussion of domestic violence and abuse in same-sex relationships, offering a unique comparison between same-sex and heterosexual contexts. Catherine Donovan and Marianne Hester examine how experiences of domestic violence and abuse are shaped by gender, sexuality, and age, seeking to understand what factors drive victims to seek or not seek help. Employing a pioneering methodology that includes both quantitative and qualitative research, they provide a new framework of analysis that they call "practices of love" that challenges heteronormative models of engaging domestic violence in research, policy, and practice.

Virtual Teams That Work Cristina B. Gibson, Susan G. Cohen, 2003-03-21 Virtual Teams That Work offers a much-needed, comprehensive guidebook for business leaders and managers who want to create the organizational conditions that will help virtual teams thrive. Each chapter in this important book focuses on best practices and includes case studies and illustrative examples from a wide variety of companies, including British Petroleum, Lucent Technologies, Ramtech, SoftCo, and Whirlpool Corporation. These real-life examples demonstrate how the principles identified in the book play out within virtual teams. Virtual Teams That Work shows how organizations can put in place the structure to help team members who speak different languages and have different cultural values develop effective ways of communicating when there is little opportunity for the members to meet face-to-face. The authors also reveal how organizations can implement performance management and reward systems that will motivate team members to cooperate across multiple boundaries. And they offer the information to determine which technologies best fit a variety of virtual-team tasks and the level of information technology support needed.

Biochar for Environmental Management Johannes Lehmann, Stephen Joseph, 2012-05-16 Biochar is the carbon-rich product when biomass (such as wood, manure or crop residues) is heated in a closed container with little or no available air. It can be used to improve agriculture and the environment in several ways, and its stability in soil and superior nutrient-retention properties make it an ideal soil amendment to increase crop yields. In addition to this, biochar sequestration, in combination with sustainable biomass production, can be carbon-negative and therefore used to actively remove carbon dioxide from the atmosphere, with major implications for mitigation of climate change. Biochar production can also be combined with bioenergy production through the use of the gases that are given off in the pyrolysis process. This book is the first to synthesize the expanding research literature on this topic. The book's interdisciplinary approach, which covers engineering, environmental sciences, agricultural sciences, economics and policy, is a vital tool at this stage of biochar

technology development. This comprehensive overview of current knowledge will be of interest to advanced students, researchers and professionals in a wide range of disciplines.
