Image Databases and Multi-Media Search Arnold Smeulders, Ramesh Jain, 1998-01-22 The World Wide Web and the Internet are signs that things will be very different in the future. And what is so striking about this computer-age future is that it comes incredibly fast and is incredibly overwhelming. Anyone who has surfed the Web has exclaimed at one point or another that there is so much information available, so much to search and so much to keep up with. Where Lycos and AltaVista are already accepted tools for textual information, image and multimedia search engines are the natural answers in the quest for pictorial information. This book provides a state-of-the-art description of that field. It contains the proceedings of a valuable workshop in Amsterdam, where people gathered to discuss the progress in the field. The topics cover computational methods of searching for pictures, the powerful pictorial clues in the recognition of objects, storage and indexing of objects in a database, and, ways to access the requested pictorial information. Contents: Multi-media Search: An Authoring Perspective (S W Smoliar et al.) Painting Retrieval Based on Color Semantics (J M Corridoni et al.) Efficient and Robust Retrieval by Shape Content Through Curvature Scale Space (F Mokhtarian et al.) Handling Multiple Instances of Symbols in Pictorial Queries by Image Similarity (A Soffer & H Samet) A New Method for Key Frame Based Video Content Representation (A Hanjalic et al.) Towards Multimedia Thesaurus Support for Media-based Navigation (P H Lewis et

Language Daniel Everett,2012-03-22 Like other tools, language was invented, can be reinvented or lost, and shows significant variation across cultures. It's as essential to survival as fire - and, like fire, is found in all human societies. Language presents the bold and controversial idea that language is not an innate component of the brain, as has been famously argued by Chomsky and Pinker. Rather, it's a cultural tool which varies much more across different societies than the innateness view suggests. Fusing adventure, anthropology, linguistics and psychology, and drawing on Everett's pioneering research with the Amazonian Pirahns, Language argues that language is embedded within - and is inseparable from - its specific culture. This book is like a fire that will generate much light. And much heat.

Fixing Stories Noah Amir Arjomand, 2022-02-17 News 'fixers' are translators and guides who assist foreign journalists. Sometimes key contributors to bold, original reporting and other times key facilitators of homogeneity and groupthink in the news media, they play the difficult but powerful role of broker between worlds, shaping the creation of knowledge from behind the scenes. In *Fixing Stories*, Noah Amir Arjomand reflects on the nature of news production and cross-cultural mediation. Based on human stories drawn from three years of field research in Turkey, this book unfolds as a series of narratives of fixers' career trajectories during a period when the international media spotlight shone on Turkey and Syria. From the Syrian Civil War, Gezi Park protest movement, rise of authoritarianism in Turkey and of ISIS in Syria, to the rekindling of conflict in both countries' Kurdish regions and Turkey's 2016 coup attempt, Arjomand brings to light vivid personal accounts and insider perspectives on world-shaking events alongside analysis of the role fixers have played in bringing news of Turkey and Syria to international audiences.
