**Memetics** Tim Tyler, 2011-08-19 Memetics is the name commonly given to the study of memes - a term originally coined by Richard Dawkins to describe small inherited elements of human culture. Memes are the cultural equivalent of DNA genes - and memetics is the cultural equivalent of genetics. Memes have become ubiquitous in the modern world - but there has been relatively little proper scientific study of how they arise, spread and change - apparently due to turf wars within the social sciences and misguided resistance to Darwinian explanations being applied to human behaviour. However, with the modern explosion of internet memes, I think this is bound to change. With memes penetrating into every mass media channel, and with major companies riding on their coat tails for marketing purposes, social scientists will surely not be able to keep the subject at arm's length for much longer. This will be good - because an understanding of memes is important. Memes are important for marketing and advertising. They are important for defending against marketing and advertising. They are important for understanding and managing your own mind. They are important for understanding science, politics, religion, causes, propaganda and popular culture. Memetics is important for understanding the origin and evolution of modern humans. It provides insight into the rise of farming, science, industry, technology and machines. It is important for understanding the future of technological change and human evolution. This book covers the basic concepts of memetics, giving an overview of its history, development, applications and the controversy that has been associated with it.

Post Memes, 2019 Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, trololololol, mode of critique, mode of production, means of politicisation, even of subjectivation -- memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticals alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. Post-Memes: Seizing the Memes of Production takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. With contributions from Scott and McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and

Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon.

**Historical Painting Techniques, Materials, and Studio Practice** Arie Wallert, Erma Hermens, Marja Peek, 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

**It's Complicated** Danah Boyd, 2014-02-25 Surveys the online social habits of American teens and analyzes the role technology and social media plays in their lives, examining common misconceptions about such topics as identity, privacy, danger, and bullying.

**Aphoristic Modernity** , 2019-10-01 For the first time in scholarship, this essay collection interprets modernity through the literary micro-genres of the aphorism, the epigram, the maxim, and the fragment. Situating Friedrich Nietzsche and Oscar Wilde as forerunners of modern aphoristic culture, the collection analyses the relationship between aphoristic consciousness and literary modernism in the expanded purview of the long twentieth century, through the work of a wide range of authors, including Samuel Beckett, Max Beerbohm, Jorge Luis Borges, Katherine Mansfield, and Stevie Smith. From the romantic fragment to the tweet, Aphoristic Modernity offers a compelling exploration of the short form's pervasive presence both as a standalone artefact and as part of a larger textual and cultural matrix.

**Women & Power** Mary Beard, 2017-11-02 An updated edition of the Sunday Times Bestseller Britain's best-known classicist Mary Beard, is also a committed and vocal feminist. With wry wit, she revisits the gender agenda and shows how history has treated powerful women. Her examples range from the classical world to the modern day, from Medusa and

Athena to Theresa May and Hillary Clinton. Beard explores the cultural underpinnings of misogyny, considering the public voice of women, our cultural assumptions about women's relationship with power, and how powerful women resist being packaged into a male template. A year on since the advent of #metoo, Beard looks at how the discussions have moved on during this time, and how that intersects with issues of rape and consent, and the stories men tell themselves to support their actions. In trademark Beardian style, using examples ancient and modern, Beard argues, 'it's time for change - and now!' From the author of international bestseller SPQR: A History of Ancient Rome.

**Paralies** Joshua Quinn, 2008-12-12 Lies, damn lies, and mentalism

*Woke, Inc.* Vivek Ramaswamy, 2021-08-17 AN INSTANT NEW YORK TIMES BESTSELLER! A young entrepreneur makes the case that politics has no place in business, and sets out a new vision for the future of American capitalism. There's a new invisible force at work in our economic and cultural lives. It affects every advertisement we see and every product we buy, from our morning coffee to a new pair of shoes. "Stakeholder capitalism" makes rosy promises of a better, more diverse, environmentally-friendly world, but in reality this ideology championed by America's business and political leaders robs us of our money, our voice, and our identity. Vivek Ramaswamy is a traitor to his class. He's founded multibillion-dollar enterprises, led a biotech company as CEO, he became a hedge fund partner in his 20s, trained as a scientist at Harvard and a lawyer at Yale, and grew up the child of immigrants in a small town in Ohio. Now he takes us behind the scenes into corporate boardrooms and five-star conferences, into Ivy League classrooms and secretive nonprofits, to reveal the defining scam of our century. The modern woke-industrial complex divides us as a people. By mixing morality with consumerism, America's elites prey on our innermost insecurities about who we really are. They sell us cheap social causes and skin-deep identities to satisfy our hunger for a cause and our search for meaning, at a moment when we as Americans lack both. This book not only rips back the curtain on the new corporatist agenda, it offers a better way forward. America's elites may want to sort us into demographic boxes, but we don't have to stay there. *Woke, Inc.* begins as a critique of stakeholder capitalism and ends with an exploration of what it means to be an American in 2021—a journey that begins with cynicism and ends with hope.

**Final Events and the Secret Government Group on Demonic Ufos and the Afterlife** Nick Redfern, 2013-08 For decades, stories of alien abductions, UFO encounters, flying saucer sightings, and Area 51 have led millions of people to believe that extraterrestrials are secretly among us. But what if those millions of people are all wrong? What if the UFO phenomenon has much darker and far more ominous origins? For four years, UFO authority Nick Redfern has been investigating the strange and terrifying world of a secret group within the U.S. Government known as the Collins Elite. The group believes that our purported alien visitors are, in reality, deceptive demons and fallen angels. They are the minions of Satan, who are reaping and enslaving our very souls, and paving the way for Armageddon and Judgment Day. In FINAL

EVENTS you'll learn about the secret government files on occultists Aleister Crowley and Jack Parsons, and their connections to the UFO mystery; revelations of the demonic link to the famous UFO crash at Roswell, New Mexico, in 1947; the disclosure of government investigations into life-after-death and out-of-body experiences; and an examination of the satanic agenda behind alien abductions. FINAL EVENTS reveals the stark and horrific truths about UFOs that some in the government would rather keep secret.

Accelerando Charles Stross,2010-11-04 His most ambitious novel to date, ACCELERANDO is a multi-generational saga following a brilliant clan of 21st-century posthumans. The year is some time between 2010 and 2015. The recession has ended, but populations are ageing and the rate of tech change is accelerating dizzyingly. Manfred makes his living from spreading ideas around, putting people in touch with one another and leaving a spray of technologies in his wake. He lives at the cutting edge of intelligence amplification technology, but even Manfred can take on too much. And when his pet robot cat picks up some interesting information from the SETI data, his world - and the world of his descendants - is turned on its head.

The Truth about Talent Jacqueline Davies,Jeremy Kourdi,2010-10-12 Key themes in the book are: 1. The need to reevaluate how people contribute and create value in today's economy - it is about knowledge, innovation and relationships today rather than executive potential tomorrow. 2. Challenging the conventional wisdom that talent refers to a 'special few' rather than the 'vital many'. Perhaps we don't have enough because we keep looking in the wrong places and doing the wrong things? 3. Conditions facing organizations are tough and competitive and markets are turbulent. To withstand this, we need to build talented organizations and talented individuals. 4. Interdependence between people within and across organizations is critical. The way that each individual relies on each other and how talent is realised through social and team ties makes a decisive, defining difference. 5. Individuals control when and who their potential is shared with. The idea that an organization can manage talent and potential is an outdated conceit. 6. The nature of work itself matters hugely. The extent to which it is stimulating and engaging - and how people can make the connection with what they do and the wider difference it makes - is vital. 7. The way talent is generated is affected by the whole 'ecology' of an organization - its sense of

purpose, rituals, the behaviour of its leaders, how it hires and how it fires people all influence the way talent is generated.

**The More Beautiful World Our Hearts Know Is Possible** Charles Eisenstein, 2013-11-05 As seen on Oprah's Super Soul Sunday A beacon of hope in the face of our current world crises, this uplifting book demonstrates how embracing our interconnectedness is key to world transformation In a time of social and ecological crisis, what can we as individuals do to make the world a better place? This inspirational and thought-provoking book serves as an empowering antidote to the cynicism, frustration, paralysis, and overwhelm so many of us are feeling, replacing it with a grounding reminder of what's true: we are all connected, and our small, personal choices bear unsuspected transformational power. By fully embracing and practicing this principle of interconnectedness—called interbeing—we become more effective agents of change and have a stronger positive influence on the world. Throughout the book, Eisenstein relates real-life stories showing how small, individual acts of courage, kindness, and self-trust can change our culture's guiding narrative of separation, which, he shows, has generated the present planetary crisis. He brings to conscious awareness a deep wisdom we all innately know: until we get ourselves in order, any action we take—no matter how good our intentions—will ultimately be wrong-headed and wrong-hearted. Above all, Eisenstein invites us to embrace a radically different understanding of cause and effect, sounding a clarion call to surrender our old worldview of separation, so that we can finally create the more beautiful world our hearts know is possible. With chapters covering separation, interbeing, despair, hope, pain, pleasure, consciousness, and many more, the book invites us to let the old Story of Separation fall away so that we can stand firmly in a Story of Interbeing.

**The Digital Academic** Deborah Lupton, Inger Mewburn, Pat Thomson, 2017-08-07 Academic work, like many other professional occupations, has increasingly become digitised. This book brings together leading scholars who examine the impacts, possibilities, politics and drawbacks of working in the contemporary university, using digital technologies. The book includes accounts of using digital media and technologies as part of academic practice across teaching, research administration and scholarship endeavours, as well as theoretical perspectives. The contributors span the spectrum of early to established career academics and are based in education, research administration, sociology, digital humanities, media and communication.

**An Anglo-Norman Reader** Jane Bliss, 2018-02-08 This book is an anthology with a difference. It presents a distinctive variety of Anglo-Norman works, beginning in the twelfth century and ending in the nineteenth, covering a broad range of genres and writers, introduced in a lively and thought-provoking way. Facing-page translations, into accessible and engaging modern English, are provided throughout, bringing these texts to life for a contemporary audience. The collection offers a selection of fascinating passages, and whole texts, many of which are not anthologised or translated anywhere else. It explores little-known byways of Arthurian legend and stories of real-life crime and punishment; women's voices tell history, write letters, berate pagans; advice is offered on how to win friends and influence people, how to cure people's ailments and how to keep clear of the law; and stories from the Bible are retold with commentary, together with guidance on prayer and confession. Each text is introduced and elucidated with notes and full references, and the material is divided into three main sections: Story (a variety of narrative forms), Miscellany (including letters, law and medicine, and other non-fiction), and Religious (saints' lives, sermons, Bible commentary, and prayers). Passages in one genre have been chosen so as to reflect themes or stories that appear in another, so that the book can be enjoyed as a collection or used as a resource to dip into for selected texts. This anthology is essential reading for students and scholars of Anglo-Norman and medieval literature and culture. Wide-ranging and fully referenced, it can be used as a springboard for further study or relished in its own right by readers interested to discover Anglo-Norman literature that was written to amuse, instruct, entertain, or admonish medieval audiences.

**A Floating Life** Tad Crawford,2012-09 Realizing that he is no longer certain about who or what he is, a middle-aged narrator attends a party and talks with an unknown woman who proves to be his wife before finding himself separated and enduring an abstract existence of mercurial boundaries before bonding with an elderly Dutch model maker who dreams of taming nature's destructive forces.

**Climate -- A New Story (16pt Large Print Edition)** Charles Eisenstein,2019-08 Flipping the script on climate change, Eisenstein makes a case for a wholesale reimagining of the framing, tactics, and goals we employ in our journey to heal from ecological destruction. With research and insight, Charles Eisenstein details how the quantification of the natural world leads to a lack of integration and our ""fight"" mentality. With an entire chapter unpacking the climate change denier's point of view, he advocates for expanding our exclusive focus on carbon emissions to see the broader picture beyond our short-sighted and incomplete approach. The natural and the material world-the rivers, forests, and creatures-are sacred and valuable in their own right, not simply for carbon credits or preventing the extinction of one species versus another. After all, when you ask someone why they first became an environmentalist, they're not likely to cite humanity's existential crisis, or our society going up in flames; they're likely to point to the river they played in, the ocean they visited, the wild animals they observed, or the trees they climbed when they were a kid. This refocusing away from impending catastrophe and our inevitable doom cultivates meaningful emotional and psychological connections and provides real, actionable steps to caring for the earth. Freeing ourselves from a war mentality and seeing the bigger picture of how everything from prison reform to saving the whales can contribute to our planetary ecological health, we resist reflexive postures of solution and blame and reach toward the deep place where commitment lives.
