The objective of YAHTZEE is to get as many points as possible by rolling five dice and getting certain combinations of dice. The dice can be rolled up to three times in a turn to try to make various scoring combinations and dice must remain in the box. A game consists of thirteen rounds. After each round the player chooses which scoring category is to be used for that round. Once a category has been used in the game, it cannot be used again. The scoring categories have varying point values, some of which are fixed values and others for which the score depends on the value of the dice. A Yahtzee is five-of-a-kind and scores 50 points, the highest of any category. The winner is the player who scores the most points. In each turn a player may throw the dice up to three times. A

player doesn't have to roll all five dice on the second and third throw of a round, he may put as many dice as he wants to the side and only throw the ones that don't have the numbers he's trying to get. For example, a player throws and gets 1,3,3,4,6. He decides he wants to try for the large straight, 1,2,3,4,5. So, he puts 1,3,4 to the side and only throws 3 and 6 again, hoping to get 2 and 5. In this game, you click on the dice you want to keep. They will be moved down and will not be thrown the next time you press the 'Roll Dice' button. If you decide after the second throw in a turn that you don't want to keep the same dice before the third throw then you can click them again and they will move back to the table and be thrown in the third throw. The Yahtzee scorecard contains 13 different category boxes and in each round, after the third roll, the player must choose one of these categories. The score entered in the box depends on how well the five dice match the scoring rule for the category. Details of the scoring rules for each category are given below. As an example, one of the categories is called Three of a Kind. The scoring rule for this category means that a player only scores if at least three of the five dice are the same value. The game is completed after 13 rounds by each player, with each of the 13 boxes filled. The total score is calculated by summing all thirteen boxes, together with any bonuses.
